

PGO
SCOOTERS

X-HOT

X-HOT

Feature of PGO Electronic fuel injection engine (125cc & 150cc)

The first scooter equipped with self-diagnose CLOSED LOOP system and automobile class OXYGEN sensor, no need to adjust fuel injection system periodically. This allows X-HOT the best fuel consumption efficiency by 58 km / Liter (constant speed).

ISC (Idle Speed Control) can automatically adjust idling to keep engine at best condition all the time, no matter in snowing weather or lean-air mountain area.

NASA PISTON (For scooters up to 125cc)

With NASA technology, the Piston is made by most advance material. NASA PISTON is twice stronger than normal piston, prolonging the engine life and reduce the noise of X-HOT.

BLACK

X Features

- X GP Style Speedometer
- X Vertical Aligned Dual Fish Eyes Head-Light
- X Wave Disk
- X Adjustable Shock Absorber with Gas Tank (for scooter 125cc)
- X Twin pipe super charge technology
- X Racing Style Fuel Cover

X Optional Accessories

- X Aluminum Anti-Slippery Plate Kit
- X Head lamp bumper
- X Premium Shock Absorber
- X Premium Front Fork
- X Wrapping Net
- X Rear Rack and Top Box
